PROFILE

Software Engineering student with hands-on experience in full-stack and web development, including frontend interfaces, backend APIs, authentication, database design, and RESTful services. Proficient in React.js, C, ASP.NET Core, Entity Framework Core, MySQL, Tailwind CSS, and Git/GitHub. Experienced in developing practical software projects and collaborating in team-based development environments. Also have experience with Python, data analysis, and machine learning. Seeking an opportunity to contribute to real-world software products while continuing to grow as a software developer.

TECHNICAL SKILLS

Languages: C#, Python, SQL, HTML5, CSS3
Frontend: React.js, Vite, Tailwind CSS, Bootstrap, SASS, Responsive Design
Backend: ASP.NET Core, ASP.NET Core Web API, REST APIs, Controllers, Services, Routing, Dependency Injection, Middleware
.NET: Entity Framework Core, LINQ, CRUD Operations, DbContext, Migrations, Swagger/OpenAPI
Databases: MySQL, SQLite, MongoDB
Tools: Git, GitHub, Visual Studio, VS Code, .NET CLI, Postman, Swagger

EXPERIENCE

Technical Associate

Jun 2026 – Jul 2026

AsanCars

- Developed RESTful APIs for user authentication and ride management using PHP and MySQL.
- Designed and managed MySQL database schemas for application features.
- Implemented authentication, data validation, and backend business logic.
- Integrated backend APIs with frontend applications and tested APIs using Postman and Terminal.

Web Developer Intern

Aug 2025 – Oct 2025

Webperts Digital Agency

- Developed responsive web interfaces using React.js, Tailwind CSS, Bootstrap, and SASS.
- Contributed to CSSAWWARDS, a full-stack website showcase platform with authentication, submissions, and voting features.
- Collaborated within a three-member development team and worked alongside backend developers.
- Practiced Git-based development, debugging, responsive design, and component-based UI development.

Data Scientist Intern

Jun 2025 – Jul 2025

DevelopersHub

- Worked with Python, Pandas, NumPy, and Scikit-learn in data analysis and machine learning workflows.
- Performed data preprocessing, analysis, model development, and evaluation.

Data Analyst Intern

Jun 2025

Excelerate

- Led a team of four interns during a marketing data analysis project.
- Analyzed data and communicated insights to support business decision-making.

Summer Intern

Jun 2024 – Oct 2024

NovaGenius

- Developed interactive web components and sliders using JavaScript.
- Built responsive interfaces using Bootstrap and SASS.
- Improved maintainability through organized and reusable CSS architecture.

PROJECTS

Course & Student Management API

ASP.NET Core — EF Core — SQLite

- Built a multi-entity ASP.NET Core Web API for managing Students, Courses, Departments, and Enrollments.
- Implemented Entity Framework Core with DbContext, DbSet, migrations, database updates, and entity relationships.
- Applied separation of concerns using Models, Controllers, Services, Interfaces, and Data layers.
- Implemented CRUD operations through REST API endpoints.

Student Management REST API

ASP.NET Core — C# — Swagger

- Converted a console-based Student Management System into an ASP.NET Core Web API.
- Developed REST endpoints for creating, reading, updating, and deleting student records.
- Applied controllers, routing, dependency injection, services, and basic ASP.NET Core architecture.
- Used Swagger/OpenAPI to test and interact with API endpoints.

CSSAWWARDS

React.js — Tailwind CSS — Vite — Git

- Built a platform for showcasing websites with authentication, submissions, and voting functionality.
- Developed responsive React interfaces and collaborated within a three-member development team.

Portfolio Website

React.js — Tailwind CSS — Vite

- Designed and developed a responsive personal developer portfolio using reusable React components.
- Implemented smooth navigation and optimized page performance.

EDUCATION

Bachelor of Engineering (B.E.) – Software Engineering

Expected Nov 2026

Mehran University of Engineering & Technology (MUEET), Jamshoro

CORE STRENGTHS

- Strong foundation in software development, object-oriented programming, and API development
- Hands-on experience across frontend, backend, and database technologies
- Fast learner with a practical approach to learning new technologies
- Problem-solving, debugging, and analytical thinking
- Team collaboration, communication, and adaptability
- Familiarity with Agile-style development workflows
